STEP BY STEP

01 Gather your best files

- Your final exported JPGs.
- Real files, never screenshots.

02 Start the page

- An Adobe Express webpage, your name as the title.
- You keep building it next year.

03 Build every entry

- One large image. An H1 centered headline.
- A short paragraph a stranger can follow.

04 Publish, test, submit

- Open it in a private window.
- Paste the link in Assignment 06.

Watch out

- **Screenshots.** They look blurry. Use the real files.
- **A link that asks to sign in.** Test it in a private window.
- **A missing entry.** Count all seven: 01 to 05, best three missions, your pick.
